JK-DY16 Hydraulic Moulder

The picture of Machine

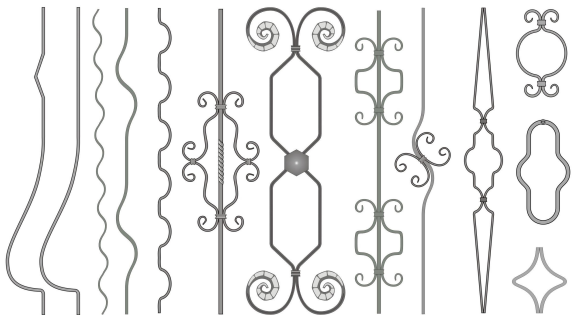

Brief Instruction

The electric machine has three functions, namely bending arc, straightening and bending angle. It can extrude square steel, round steel and flat iron into round, arc, angle and some different shapes in one time. The electric appliance part is provided with timing control, and the automatic reset ensure the consistency of the angle of the folding, both single production, but also can be mass production. The processing capacity of the equipment is very large, can processing 16*16 mm square steel, 50*8 mm flat iron, high production efficiency, per hour can be angular 300 pieces, the use of a wide range, easy to operate, the applicability of the goods. It's the iron art processing machinery and equipment indispensable.

Main Features:

1. The machine can finish the moulding and processing of metamorphoses iron craftwork with good consistency, and can process part in batches and high efficiency.
2. Step-less pressure adjustment, stable operation of machinery, to ensure the effectiveness of its work.
3. It has manual control and foot switch, it can be operated conveniently and reliably.
4. Can processing 16*16 mm square steel.
5. Per hour can be angular 300 pieces of square steel.

The picture of Product

Main Performance

Working Ability	Flat Iron	≤ 50*10 mm
	Square Steel	≤ 16*16 mm
	Round Steel	≤ φ 16 mm
Max Working Pressure	20 MP	
Max Working Stroke	250 MM	
Motor Performance	7.5 KW	
Voltage	380 V	

Attaching Parts

Package Performance

J° Pallets	1
Dimensions of the machine	1230*600*1140mm
External Dimensions	1280*650*1200mm
Volume	1 m ³
Net Weight	780 KG
Gross Weight	850 KG

Other Features:

- Pallet bench to move the machine easily to the work site or storage.
- The machine is delivered completely mounted.
- Packaging with steel pallet and 3-layered cardboard, suitable for sea freight.
- Optional: Complete wooden packaging for free fumigation.

We guarantee safe, fast and efficient transport.
